Full Lifecycle API Security Platform

Why API Security

APIs are designed to allow access to your data, systems and applications.

API development velocity has changed WAFs weren't built for APIs, and according to Gartner, API are the #1 attack vector.

APIs expose your organization Business Logic.

API Security Threats

- LACK OF VISIBILITY & OWNERSHIP**
Companies and security organizations are not aware of all of their APIs.
- DATA LEAKS & COMPLIANCE**
PII leakage through APIs harms compliance with regulations e.g. GDPR, HIPAA, Open Banking etc.
- HACKING & ABUSE**
Companies don't know who is using their APIs and whether usage is authorized and reasonable.

Cybersecurity Leaders

Founded by former CTO of Israel's National Cyber Directorate, we have the top Israeli Cybersecurity talent.

Proprietary AI Technology

Patent-pending AI & ML technology created by leading academics with PhDs in CS and Machine Learning.

Full API Lifecycle

From development to production - our products secure APIs and defend against API Security threats.

Our Full Lifecycle platform

Full protection across the entire API lifecycle, through Development, Testing and Production.

Experts Focus on API Security

API will be the #1 attack vector by 2022, WAFs alone are ineffective.

AI-powered API Security solutions are gaining widespread adoption.

APIs expose application logic and sensitive data, thus have increasingly become a target for attackers.
